

SELECT with various clause – GROUP BY, HAVING, ORDER BY

GROUP BY - HAVING

1. Display the course description and number of students registered in each course

```
mysql> SELECT C.CourseDescription,  
->          COUNT(R.RegNo) AS Number_of_Students  
-> FROM COURSE C  
-> JOIN REGISTER R  
-> ON C.CourseNo = R.CourseNo  
-> GROUP BY C.CourseDescription;  
+-----+-----+  
| CourseDescription | Number_of_Students |  
+-----+-----+  
| Statistics        | 2                   |  
| Programming       | 3                   |  
| Database          | 1                   |  
+-----+-----+  
3 rows in set (0.09 sec)
```

2. Display the number of courses registered by each student

```
mysql> SELECT S.RegNo,  
->          S.Name,  
->          COUNT(R.CourseNo) AS Number_of_Courses  
-> FROM STUDENT S  
-> JOIN REGISTER R  
-> ON S.RegNo = R.RegNo  
-> GROUP BY S.RegNo, S.Name;  
+-----+-----+-----+  
| RegNo | Name  | Number_of_Courses |  
+-----+-----+-----+  
| 101   | Ravi  | 2                 |  
| 102   | Priya | 2                 |  
| 103   | Arun  | 2                 |  
+-----+-----+-----+  
3 rows in set (0.01 sec)
```

HAVING Example

Display courses having more than one student.

```
mysql> SELECT CourseNo,  
->          COUNT(RegNo) AS Total_Students  
-> FROM REGISTER  
-> GROUP BY CourseNo  
-> HAVING COUNT(RegNo) > 1;
```

CourseNo	Total_Students
C001	2
C002	3

2 rows in set (0.06 sec)
